

# GERMAN-BUILT SCHAFFER A PROVEN PERFORMER FOR AUSTRALIAN COUNCILS

After years of being put through their paces in Local Government, Schaffer articulated loaders have emerged proven performers.

They are agile enough to squeeze into the tightest spots and have the versatility to adapt to almost any job, with powerful hydraulics that can run over 50 accessories. A popular replacement for skid steers, Schaffer loaders avoid costly ground damage.

Yet despite their nimble performance on the job, German-engineered Schaffers are distinguished by their robust heavy-duty industrial build. And for sheer grunt, Schaffers are unsurpassed!

Add excellent green credentials and fuel economy, together with OH&S-friendly features, and Schaffer ticks all the boxes.

Schaffer Loaders has been Europe's most trusted name in loaders for over 50 years. Schaffer in Australia is a division of Agtech International, offering a high level of personal service and local spare parts back-up.

Throughout central and southern Queensland, Schaffer is represented by the David Evans Group and Black-Trac, which is now also part of the David Evans Group. In far north Queensland Brent Hudson's Specialist Maintenance Services is the local agent.

Schaffer also has local dealers at Godings, Rockbank, Victoria and SA Tractors, Cavan, South Australia.

Schaffer loaders are available in sizes from 30hp up to 130hp, with most Local Governments choosing models up to 70hp.

The new Schaffer 4350Z loader, available in 50hp and 60hp models.

The Sunshine Coast Council selected a Schaffer 2336 mini loader for tree work including loading cut sections and mulch.

The Royal Tasmanian Botanical Gardens, Hobart purchased a Schaffer 3150 for general maintenance work.

Asset Maintenance Co-ordinator Don Heazlewood says the maintenance team uses it for compost turning, loading soils into utes and pallet unloading.

"It's also great for landscaping, including surface levelling," Don says. "It's easy to use and a competent performer."

Australian Schaffer proprietors Cameron, Elizabeth and Brett Moir.
